Gustavo Brizuela

AI Automation Engineer · AI agents & automation

SUMMARY

I build AI systems that do real work inside companies: agents that answer and negotiate on their own, automations that remove manual tasks, and dashboards wired to live business data. Working in automation and integrations since 2023, I own projects end to end, from the first conversation with the team to production, and I measure them in hours and money.

EXPERIENCE

AI Automation Engineer · Bloop

Aug 2026 – Present

- Part of the development team running AI transformation projects for companies: process automation, AI agents and integrations with the systems each company already uses.

AI Engineer · SLS Global (foreign trade)

Mar 2026 – Nov 2026

Remote · Started as digital transformation consultant (Mar – May 2026)

- Mapped repetitive foreign-trade processes and automated document flows, operations tracking and communications with external agencies.
- Designed and built an autonomous sourcing system: from a product form (text or image) to finished supplier quotes in ~24 h, doing the work of ~5 people. AI agents negotiate in English from several accounts in parallel (FOB price, MOQ, CBM, port, packaging) through a direct SDK + WebSockets integration.
- Re-architected the negotiator into a classifier + specialist sub-agents with code-level guardrails: monthly AI cost from US$ 279 to US$ 10 on real September volume (−96%), with correct answers rising from ≤ 92.4% to 96.2% on 262 real calls (validated in a sandbox that replays production calls).

Founder · FluxIA

Mar 2025 – Jul 2026

Buenos Aires

- Founded an AI automation studio; projects for auto parts, healthcare, real estate and travel companies (see Selected projects).
- Built vertical SaaS products: GymOS (gyms) and RoomOS (hotels). Created FluxIA Academy, with content on automation and AI.

AI Solutions Developer · Freelance

Since Nov 2023

Remote · Clients: Emarkets (Ecuador), Dec 2024 – May 2026 · DIVISUAL PROJECT (Andorra), Jul 2025 – Aug 2026 · Apoc Automation (Argentina), Jul 2025 – Jul 2026

- Automations with n8n, Zapier and Make for clients across several industries; up to 40% less operational time with custom automations.
- API and webhook integrations connecting CRMs, e-commerce, marketing platforms and management systems; scraping for data collection and prospecting.
- AI chatbots to improve customer service and operational efficiency.

SELECTED PROJECTS

WhatsApp bot + custom CRM

Dr Moguel Dental · 1 month

Instant replies and a custom sales pipeline; WhatsApp conversion up almost 70%.

Internal AI agent over 6 data sources

Desarrolladora Baluassi S.R.L. · 1 month

ERP, CRM, pipelines, WhatsApp and email in one database; questions that took days now take minutes.

Management dashboards on the ERP

Nueva Sociedad S.A. · 2 weeks

Direct ERP connection and 4 dashboards with targets, alerts and AI-suggested actions.

Automated hotel availability

Travel company

n8n + Playwright on Railway: availability reports to the sales team several times a day.

SKILLS

AI & agents	Claude, OpenAI, multi-agent design, chatbots, evals & QA, Claude Code	**Automation**	n8n, Zapier, Make, Playwright, webhooks, scraping
Backend & data	Node.js, TypeScript, Supabase, PostgreSQL	**Frontend**	Next.js, React, SaaS products
Integrations	WhatsApp Cloud API, Meta Graph API, Evolution API, Chatwoot, ERP	**CRM & infra**	HubSpot, Zoho, Airtable · Vercel, Railway, Linux VPS

LANGUAGES

Spanish — native
Portuguese — advanced
English — intermediate

EDUCATION & TEACHING

Process automation course · 2024 – 2025

High school diploma, Social Sciences · 2013 – 2019

Taught a 16-class Claude Code course to 21 students (2026).

LEADERSHIP

Volunteer & community project coordinator · Non-profit organization · 2020 – 2024. Led social projects that reached 3,000+ people: planning, budgets, fundraising campaigns and aid distribution.
